Steffl DRILLING & PUMP

Licensed Well Drilling Contractor In:
MN | ND | SD | IA | WI

CAPABILITY STATEMENT

Steffl Drilling & Pump is a well drilling and pumping system contractor that constructs water wells, monitoring wells, cathodic protection wells, and geothermal heat loop borings with thermal conductivity testing. Additional related capabilities include well sealing and abandonment, repairing water pumping systems and installing water treatment and filtration systems.

CORE CAPABILITIES

Water Well Drilling:
We provide expert design and construction services for water well drilling projects ranging from monitoring wells to high capacity water supply wells for Government facilities such as DNR Parks and MN DOT Brine Facilities.

Geothermal Heat Loops & Thermal Conductivity Testing:
Our IGSHPA Certified contractors are able to construct vertical geothermal heat loop borings and conduct thermal conductivity testing to assist in geothermal heating and cooling design for eco-friendly Government facilities.

Water Pumping Systems and Pressure Tanks:
We specialize in the installation and repair of all types of water pumping systems ranging from submersible pumps and lineshaft turbines to pressure tanks and pressure switches.

Water Treatment and Filtration Systems:
Our restricted master plumbing license enables us to design and install water treatment equipment at DNR Parks and related facilities located in municipalities with less than 5,000 people.

Fire Protection Water Well Design:
We provide design and construction services for fire protection systems that utilize a water well in various government facilities to meet building code requirements.

KEY DIFFERENTIATORS

What sets Steffl Drilling & Pump apart is our extensive knowledge and equipment that allows us to service a wide area with vastly different geologic conditions. Every well-related project has unique requirements and our deep industry knowledge allows us to deliver solutions that address each clients' specific needs. Our team offers 24 Hour, 7 Day a week emergency services to ensure facilities have running water around the clock.

COMPANY SNAPSHOT

CAGE: 1EZG0 **UEI:** VWDKWK3SBZ73

Minnesota State Vendor Number: 0000210194

NAICS Code:
237110 - Water and Sewer Construction
238220 - Plumbing, Heating, and Air Contractors
221310 - Water Supply and Irrigation Systems

Work Area: MN | ND | SD | IA | WI

Socio Economic:
Equity Select - Certified Targeted Group Business
Federal - Service Disabled Veteran Owned Business

PAST PERFORMANCE

Camp Ripley Vet Museum Water Supply Well:
Designed and constructed a 50gpm public water supply well and pumping system to supply a new museum.

DNR Parks & Facilities - Minnesota:
Replace or repair submersible pumps and pressure tank systems at facilities across the state of Minnesota.

DOT Brine Production Water Wells - Minnesota:
Designed and constructed water supply wells and pumping systems for brine production at DOT facilities.

Westonka Library Geothermal Heat Loop:
Installed 260ft geothermal heat loop with thermal conductivity testing to facilitate the design of a loop field.

South Dakota Dept. of Corrections Geothermal Heat Loops:
Installed 500ft geothermal heat loops with thermal conductivity testing to facilitate the design of a loop field.

Faribault Correctional Facility Line Shaft Turbine:
Repaired and replaced an 800gpm lineshaft turbine on 210ft of 8" column in one of the wells on site.

MPCA Monitoring Wells:
Constructed 2" monitoring wells in various areas of the state of Minnesota for the MPCA to monitor water contamination.
